

# SHEERFILL® ILLUMINATE 28 SILVER

## SHEERFILL® Illuminate 28 Silver

The Illuminate family of SHEERFILL® Architectural Membranes is designed for use as a roofing or facade material where higher light transmission is desired, while enabling creative design options possible with single layer tensile membrane systems. The addition of color does reduce light transmission versus unpigmented fabric.

All SHEERFILL® membranes conform to rigid fire and building codes for permanent structures.
