

SHEERFILL® SGM-30 PB

SGM is a family of shade mesh architectural fabrics used in façade and shading applications. The composite is made of fiberglass and polytetrafluoroethylene (PTFE). The mesh construction allows for more lighting to enter the space and allows air to circulate through the fabric.

SGM-30 PB is pre-bleached to a white color. The standard version is tan and will bleach to white with exposure to sunlight.

All SHEERFILL membranes conform to rigid fire and building codes for permanent structures.
